1	Materials & Labour for Installation of new CU to provide RCD protection for all circuits Supply and installation of 10 way consumer unit with Dual 63A RCD protection device as per BS7671:2018 and PartP of building regulation. The consumer unit will replace the existing plastic consumer unit and all circuits within the dwelling will be served by it. This will eliminate the need for a separate CU for RCD protection for lighting circuits as per our other quote. This would also eliminate the following items from yesterdays quote: Item 4, 8, 14, 20 & 21	£410.00	£410.00
1	Testing and certification as required for PartP of the building regulations and notification to your local authority Included as part of our service. All tests that were done during the EICR would be done again as part of this work, it would be interesting to see if the same results are shown and if the further investigations to your socket circuits will still be required!	£0.00	£0.00
